

# Kodak OrthoTrac

## Point-of-Care Module

The Kodak OrthoTrac point-of-care module is designed to help take your practice to a new level of efficiency and communication with your patients. By leveraging the tablet PC's mobility and stylus driven input method, the point-of-care module delivers critical patient data when you need it – even chairside.

### Access to information when you need it most

Our point-of-care module puts important patient information in the palm of your hand when you need it the most. While chairside, you can have instant access to each patient's treatment history, images, and x-rays without ever pulling a chart.

### Streamlined office workflow

Our point-of-care module provides an all-in-one clinical interface to Kodak OrthoTrac practice management software. It pulls together information from multiple sources such as our patient flow module, charting module, and Kodak orthodontic imaging software to give instant access to patient information and to help manage your patients in the clinical area.\* You can easily post treatment information, view and discuss x-rays with patients, and generate correspondence to referring doctors—all without leaving the clinic.

\*Kodak OrthoTrac patient flow module and Kodak OrthoTrac charting module are required to utilize the Kodak OrthoTrac point-of-care module.

# Efficient. Comprehensive. Flexible.

## Designed for the way you practice

The OrthoTrac point-of-care module is adaptable to the way doctors and their staff interact with patients. It can be utilized on desktop computers or tablet PCs to give you even greater flexibility. So whether you're in the clinic or in a consult room, you can take advantage of the benefits our point-of-care module has to offer.

## Improved care and communication

By helping eliminate excess paperwork, our point-of-care module enables more chair time with your patients. Plus, imagine being able to hand a patient your tablet PC with a copy of their panoramic x-ray, so you can clearly explain treatment needs and options. Your patients will appreciate the improved communication and patient/doctor interaction.

## Complete and easily accessible information

With our point-of-care module, you can access a patient's full treatment history and images without ever pulling a chart. This means you can focus on your patient instead of flipping through a paper chart to find the information you need.

## Commitment to service and support

Our staff is ready to provide the guidance and support you need every step of the way from implementation to training and beyond.
